USER ACCEPTANCE TESTING (UAT) DOCUMENT

Date	22.09.2026
Team ID	SWTID-2026-7438
Project Name	AI FAQ Assistant
Project Version	1.0
Testing Period	22.09.2026

1. Project Overview

Project Name: AI FAQ Assistant

Project Description: AI FAQ Assistant is designed to help users obtain answers to frequently asked questions through an interactive question-and-answer interface. The system accepts user queries and provides relevant responses based on the available FAQ information.

Project Version: 1.0

Testing Period: 22.09.2026

2. Testing Scope

The UAT covers the main user-facing functions of the AI FAQ Assistant, including:

• Opening and accessing the AI FAQ Assistant.

• Entering frequently asked questions or user queries.

• Submitting a question to the assistant.

• Displaying an appropriate answer for a recognized FAQ.

• Handling unclear or unsupported questions with a suitable response.

• Clearing or resetting the input when applicable.

• Checking the overall usability and response display.

3. Testing Environment

Application: AI FAQ Assistant

URL/Location: Project application interface

Credentials: Not required for basic FAQ testing.

4. Test Cases

Test Case ID	Test Scenario	Test Steps	Expected Result	Pass/Fail
TC-001	Open the AI FAQ Assistant	1. Open the application. 2. Check the main interface.	The AI FAQ Assistant interface should load successfully.	
TC-002	Enter a frequently asked question	1. Click the question/input field. 2. Type a valid FAQ.	The question should be entered correctly without errors.	
TC-003	Submit a valid question	1. Enter a valid question. 2. Submit the query.	The assistant should process the question and display a relevant answer.	
TC-004	Ask another FAQ	1. Enter another supported question. 2. Submit it.	A suitable response should be displayed for the new question.	
TC-005	Enter an unclear question	1. Enter an unsupported or unclear question. 2. Submit it.	The system should provide an appropriate fallback response instead of fa	

Test Case ID	Test Scenario	Test Steps	Expected Result	Pass/Fail
TC-006	Check response display	1. Submit a question. 2. Observe the response area.	The answer should be clearly visible and readable.	
TC-007	Test repeated queries	1. Ask multiple questions one after another. 2. Observe each response.	The system should handle repeated queries correctly.	
TC-008	Check user-friendly operation	1. Use the input and response interface. 2. Observe navigation and interaction.	The interface should be simple and easy to use.	

5. Bug Tracking

Bug ID	Bug Description	Steps to Reproduce	Severity	Status	Additional Feedback
BG-001	No confirmed defect recorded at the time of document preparation.	—	—	Not Reported	To be updated during UAT if an issue is

6. Sign-off

Tester Name: _____

Date of Test Completion: 22.09.2026

Signature: _____

7. Notes

• All test cases should cover both positive and negative scenarios where applicable.

• Testers should record actual results and provide feedback for any issue identified.

• Any defect should be recorded with severity, status, and reproducible steps.

• Final sign-off should be obtained after completion of UAT and review of identified issues.
